

1st Workshop Announcement: A Joint DynVarMIP · SPARC DynVar · SNAP Meeting 22-25 October 2019 · Madrid

Hosted by the Facultad de Ciencias Fisicas - Universidad Complutense de Madrid

Atmospheric Circulation in a Changing Climate

Scientific Program

- A mechanistic understanding of atmospheric circulation trends
- The role of atmospheric dynamics in climate model biases
- Atmospheric heat and momentum budgets in a changing climate
- Stratosphere-troposphere coupling and tropospheric predictability

Travel support for early career scientists and attendees from developing nations is available from partnering organizations.

Abstract + Travel Support Deadline: 30 June 2019
